

TCA Architects Win Three Awards at the HBSA's Celebrate 2014

December 1st, 2014

TCA | Thier + Curran Architects are thrilled to announce that they were the recipients of **Three Awards** at the Hamilton Burlington Society of Architects (HBSA) 'Celebrate 2014 Gala', held November 27th. Following the [2013 Hamilton Urban Design and Architecture Awards](#) where TCA won 3 awards including the top 2 honours, these wins cement TCA's position as one of the premier architecture firms in the region.

The HBSA Celebrate 2014 Awards received are:

The Award of Merit for Renovation Institutional Use

Ancaster Senior Achievement Centre

In giving the award the Jury commented that the building was "well crafted, welcoming, with careful attention to detail" and had "handsome interior spaces filled with light."

The Award of Excellence for Renovation Mixed Use / Commercial Use

118 James St. North

In giving the award the jury commented:

"This building is a surprise. The interior space is dramatic, the connection to heritage vocabulary really strong, and the experience at street level is very successful."

"The building echoes the street's urban signature."

The Award of Excellence for Heritage / Adaptive Reuse

95 King St. E Arts Centre and Lofts

In giving the award the jury commented:

“Even viewed from across the square (Gore Park) this building with its innovative social program is distinctive and inviting” and

the “Historic character of the upper floors is maintained while the contemporary-industrial treatment of the ground floor stands out and anchors it in the urban realm.”

About TCA

Founded in 2005, TCA is a dynamic firm that is busy, growing and ambitious. We are award winning Architects with local, national and international project experience.

Our buildings are thoughtful and engaging. They transcend the ordinary.

Our work is understated, sophisticated contemporary architecture that seeks to subvert accepted paradigms. Our work is decidedly modern, yet respectful of context and history. We challenge conventional design and conventional design process, providing quality design, innovation and technical execution for projects of every scale. We treat our clients' money like it was our own.

Our projects include education facilities, public buildings, housing, interiors, cultural facilities, commercial and mixed-use buildings, and health care projects. This wide range of projects encourages creativity and freshness of approach to each new assignment.

We undertake interior design and urban design projects, and we pay attention to detail including designing our projects' signage. We are very adept at using colour and take great care in selecting finish materials.

The office is a dynamic team-based environment, emphasizing knowledge-based and research-oriented design. A studio approach is employed for problem solving across all levels of architecture, planning, and interior design. The firm stresses collaboration and communication, and is committed to the life-long professional development of all staff members.

As a medium-sized firm, we are well suited to handle large projects while still assuring 'hands-on' personal commitment on the part of the Principal and key staff. We offer the many advantages of working in a medium size office such as lots of variety of building types and sizes, and we are staffed by broadly skilled people who can work on multiple projects and flexibly move from one task to another.
